Gangsta Style Franklin

How to Install ?

1. With OpenIV open, click on "Tools" in the toolbar, then "Package Installer".

2. In the window that pops up, open "Gangsta Style Franklin.oiv".

3. Click install, I HIGHLY recommend choosing "Install to mods folder", makes adding/removing mods and fixing any issues much easier.

UNINSTALL :

Same as above, except "install" the "Gangsta Style Franklin- Uninstall.oiv" file. It will replace modded files with original ones.
